

***HVAC Capital's Tax-Exempt Program can Increase your sales with
Schools/Municipalities/Universities***

All of you have encountered situations where a school would not agree to the installation of a controls system because of a lack of capital. You often hear ***“its not in the budget”*** or ***“wait ‘til next year”***.

Schools really like our program. Why?

- We provide funds when they are ***capital constrained***.
- We provide capital that enables them to ***lower their operating costs***.
- We have ***competitive rates*** (currently around ***4.5%*** for projects over \$1MM). However, we can fund tax exempt deals as low as \$25,000!
- We offer ***10 year terms*** (stretching out the term often ***enables the cost reductions to cover the lease payments***).
- We offer ***flexible payment terms*** including monthly, quarterly, semi-annual, and, annual in some cases.

All the above also applies to local/county/state owned buildings including ***city halls, police and fire stations, libraries, universities, etc.....***

Are you ready to differentiate yourself from your competitors (or, in some cases, keep up with them)?

Give us a try. You can visit our website at www.hvaccapital.com, or, call me at (866) 652 - 7177 and learn more about the program.
