

We are pleased to offer you a finance program through HVAC Capital Corporation to finance the replacement of your HVAC equipment. How can your hospital benefit from our program?

100% Financing

Unlike bank financing, which often requires a large down payment and excludes soft costs (such as installation, shipping, maintenance, etc.), we can **finance the entire installation** with no down payment.

Preserve Capital for Other Purposes

Dedicate more capital to upgrading medical equipment to **keep your institution up to date with the latest technology.**

Payment Plan to Match your Cash Flow

Payments structured up-front to **meet your cash flow requirements.** Payments can be lower at the beginning of the financing period and increase over time. Also, payments can fluctuate within the year.

Solve your budgeting problems

Low monthly payments – avoid large cash outlay and own your equipment at end of the lease with \$1 purchase option. **No confusing end of lease options.**

Easy process

Transactions under \$100,000 usually do not require financial statements and can be approved **in a few hours.** You simply fill out our one-page application.

Longer Terms Available

Most banks are reluctant to go out over 5 years. We can finance up to 7, thus lowering your monthly payments and **conserving your cash.**

We Specialize in Financing Mechanical Systems

As you can tell by our name, **this is all we do.** Most leasing companies will not finance replacements of mechanical systems due to an abundance of soft costs, lack of understanding of the equipment, etc... We deal with these issues every day, resulting in a smoother closing process for you.
